Professional Profile

Full Stack Software Engineer. I design, build, and ship web products, AI-powered solutions, and integrations (APIs, data, and cloud) with a focus on user experience and production delivery. Embedded experience with retail clients: on-premise agents, legacy databases, and high-impact MVPs. 1st Place at Samsung Innovation Campus (AI) and National JIC APANAC. Open to opportunities. Panama City.

Professional Experience

Posper Panama

2025 – Present

Forward-Deployed Engineer / Full Stack Developer

Panama City

- **Branch agents & edge:** Designed and installed local agents (Electron, Tauri) for automated invoice extraction from MySQL (read-only), with queues, heartbeats, and sync to cloud PostgreSQL (Bun/Hono).
- **PoS integration & rapid prototyping:** Gathered requirements and deployed kiosk/web platforms with dynamic SKU campaigns via REST APIs (Django REST, Node.js), JWT, and WebSockets.
- **Production front-end:** Admin dashboards and public UIs with React 19, Astro 5, TypeScript, and TailwindCSS (islands architecture) to improve load time and usability.
- **Infrastructure:** Docker Compose, GitHub, Railway, and Vercel; monitoring, technical documentation, and production releases.

Educational Content Development in Python

2025

Instructor and Curriculum Designer

Panama City

- Curriculum and hands-on materials for Python, algorithmic problem-solving, and data logic at the secondary-school level.

Selected Projects

SmartHabit AI – Consumption forecasting | TensorFlow, Keras, Python, Pandas, Chart.js

2025

- **1st Place, Samsung Innovation Campus (AI):** Solo project: idea, multi-horizon LSTM (1h, 6h, 12h, 24h) for energy, water, and cost; AMPDS data pipeline; savings alerts; interactive dashboard. Live demo on Vercel. MAE/MAPE metrics.

Amber Alert System – Mass notification | Django, MySQL, Web Push APIs

2025

- **1st Place, National JIC APANAC (Highest Social Impact):** Low-latency Web Push alerts (< 2 s) with no mobile app; admin panel and public UI for traffic spikes. Presented at JIC 2025 and the 20th APANAC Congress.

Rent Tools – Equipment rental marketplace | REST, AWS S3, responsive UI

UTP

- Academic web platform: identity verification (ID + selfie), calendar booking, real-time inventory, notifications, and REST + AWS S3 storage.

Technical Skills

Frontend: TypeScript, JavaScript, React 19, Astro 5, HTML/CSS3, TailwindCSS, Chart.js, Vite, responsive UI.

Backend & data: Node.js (Express, Bun/Hono), Python (Django REST), REST APIs, JWT, WebSockets, PostgreSQL, MySQL, SQL.

AI & analytics: LLMs (Claude, Gemini), TensorFlow/Keras, LSTM, Pandas, NumPy, data pipelines, extraction agents.

Infra, mobile & integrations: Docker Compose, Git/GitHub, AWS (S3, Academy Cloud Developing), Railway, Vercel, Electron, Tauri, Flutter, C#, Postman, Linux/Bash.

Education & Certifications

Universidad Tecnológica de Panamá (UTP)

2022 – Present

B.S. in Software Development and Management (4th year)

Panama City

AWS Academy — Cloud Developing (40 h)

2026

Samsung Innovation Campus — Python & Data Analytics

2025

APANAC / UTP — 20th National Science & Technology Congress (30 h) & JIC 2025

2025
